

Leaf Electronics - Internship Product Designer

We are looking for an enthusiastic 3rd or 4th year student to join our Yes!Delft LaunchLab start-up, for a period of a minimum of one month for approx. 2 days a week. Develop your conceptual product design skills and be part of an exciting start-up project in the field of sustainable circular home electronics.

You are:

- Enthusiastic & knowledgeable about Circular Product Design
- Strong in conceptual design thinking and problem solving
- Familiar with design of (consumer) electronics
- Fluent in English and Dutch
- Interested in working with a start-up: creative, curious and flexible
- Available to start immediately

We are:

- Experienced marketeers entrepreneurs who have recently sold their company;
- A young Yes!Delft LaunchLab start-up located in Leiden and Delft;
- Committed to positively changing the market of consumer electronics by creating durable, sustainable and better products;
- Looking for the technical & creative extra team member who can contribute to the conceptual design of our envisioned product line!

We offer:

- A work space in an informal, creative setting including iMac & Adobe Creative Suite, located next to Leiden Central Station;
- Flexible working hours and conditions;
- The opportunity to become a co-founder of our company;
- Strong coffee & cookies;
- A fun & exciting experience!

Would you like to apply?

Great! We look forward to meeting you.
